ACE FRAMA Automation - Control - Electronics

Services and applications.

Services of the industrial branch:

- Design projects for electrical control and automation.
- Drawing plans in AutoCad.
- Development, execution of electrical and mechanical projects.
- Allen Bradley, Siemens, Telemecanique, Fanuc.
- Configuration and installation of programmable logic controller (PLC).
- Design and development of Ladder programming.
- Construction and integration of control panels.
- Electrical installations, industrial and commercial lighting in general.
- Diagnosis and repair of electronic boards of industrial equipment.
- Construction of Control Panels for all automation.
- Control Panel of a Cooling Tower.
- Panel view programming Allen Brdley, Siemens Simatic Screens, Telemecanique PV Magelis Screen Installed for Fault Monitoring and Cooling Tower Start.

Press controls:

- Automation of old press controls to current designs according to customer requirements.
 - Installation, sale and programming of standardized controls for any brand press.
- Field services.
- Update of diagrams.

Robotics and control engineering:

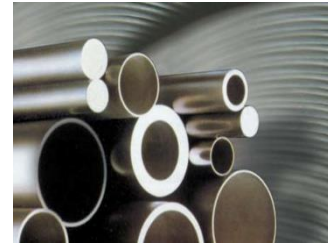

- Installation and programming of Robots (ABB, Fanuc, Motoman)
- Field services, process optimization through updating or changes from manual to automatic processes.
- Robot applications currently handled: Material handling, Mig welding, Spot welding, seal application.
- Power and Control of Welding Cell, Robot of Welding Cell RIDE CONTROL OF MEXICO.
- Programming of PLC, programming of communication networks, programming of HMI (Man Machine Interface).
- Electrical service in control and power, industrial facilities, electrical installations, control, robotics and PLC.

Manufacture and installation of stainless steel pipe:

- Stainless Steel Pipe Stage 5 Painting Cabin in RIDE CONTROL DE MEXICO

Civil Engineering:

- Design and construction of projects, construction and expansion of roads
Construction of bridges.
- Design and construction of projects, private buildings, sports units.

Heavy machinery movement service:

- Transfer service, relocation, dismantling of production lines, heavy machinery, etc.

Rental and maintenance of forklifts:

- Genie income (articulated arm). Platform income.
Income of welding machines. Forklift repair. General mechanics.
